Explore, experiment and transform with an Imperial Executive Education

Imperial College London is one of the world’s top 10 universities, specialising in business, technology, science, engineering and healthcare. Our world-leading scientists are at the forefront of innovations that will have a major impact on business and society in the future.

Developing new insights and methodologies is a core purpose of our research. Through our institutes and research centres we are engaging with international organisations, SMEs and policy-makers around the world, addressing key challenges for modern business and creating practical solutions with significant real-world impact.

Examples of our centres and institutes are:
- The Data Science Institute (DSI)
  The world-class DSI partners with both Huawei and Zhejiang University in China to stimulate cross-disciplinary collaboration and solve data-related challenges in the business environment.
- The Energy Futures Lab
  Cross-discipline institute tackling the broad range of global energy challenges.
- Institute of Global Health Innovation
  Designs, develops and delivers high impact global healthcare innovations.
- The KPMG Centre for Advanced Business Analytics and Data Observatory
  Committed to evaluating how the digital revolution is transforming society and its effects on the future of business, the centre also houses the global data observatory (GDO), the largest immersive data visualisation studio in Europe.
- The Brevan Howard Centre for Financial Analysis
  Blending engineering and computational finance with financial economics, the centre is devoted to developing a better understanding and management of risk whilst promoting investment and productivity.
- Centre for Global Finance and Technology
  The Imperial College Business School hub for multidisciplinary research, business education and global outreach aimed at achieving greater understanding of the impact of technology on finance, business and society.
